

# MOTION rehab

NEUROLOGICAL REHABILITATION FOR STROKE,  
HEAD INJURIES, SPINAL CORD INJURIES,  
CEREBRAL PALSY, PARKINSON'S, MS AND  
OTHER NEUROLOGICAL CONDITIONS

MOTIONrehab is a multi-disciplinary neurological rehabilitation company providing services across Yorkshire and Humberside. MOTIONrehab have great success in improving the quality of life of adults and children with neurological injuries or illnesses, such as Stroke, Brain Injury, Spinal Cord Injury, Multiple Sclerosis, Parkinson's Diseases, Cerebral Palsy and other neurological conditions.

# Reach your potential

**MOTIONrehab** is renowned for its person-centred approach to neurological rehabilitation, personalising each individual's therapy to enable everybody to reach their potential. Neurological injuries or illnesses cause damage to the nerve pathways that connect the brain to the rest of the body.

This affects the ability to move the body and results in difficulties with mobility, day- to-day activities and independence. **MOTIONrehab** offers specialist neurological rehabilitation to help promote the re-wiring of the nerve pathways, helping people with the things they might find difficult to do.

# Specialist Neurological Physiotherapy

**MOTIONrehab's** Specialist Neurological Physiotherapists offer both clinic and home-based appointments. The team have a wide range of expertise and use a range of approaches in our treatment such as hands-on therapy, neurological rehabilitation technology and exercise. Rehabilitation programmes start

with a face to face consultation and assessment. Working in partnership, a therapy plan is created to help achieve personal goals. **MOTIONrehab** recognises everyone's goals are different whether it be getting in and out of bed or running a marathon. **MOTIONrehab** will help you achieve your goals.

**REACH YOUR POTENTIAL** **MOTIONrehab** will help you achieve your goals.

## NEUROLOGICAL OCCUPATIONAL THERAPY

Neurological Occupational Therapy facilitates the recovery of life skills, developing new ways of achieving independence in everyday activities. **MOTIONrehab** work with individuals to determine what activities are most important to them. This may include completing selfcare tasks, taking part in leisure and social opportunities, obtaining or retaining employment.

## SPEECH AND LANGUAGE THERAPY

Speech and Language Therapy can help adults and children who have difficulties with communication, eating and drinking. **MOTIONrehab** can provide rehabilitation for; facial movement, speech, listening, reading and writing, as well as social communication. **MOTIONrehab** offer a range of SLT services working directly with individuals, their families, friends and those who support them.

# International Reference Centre for treatment, teaching & research

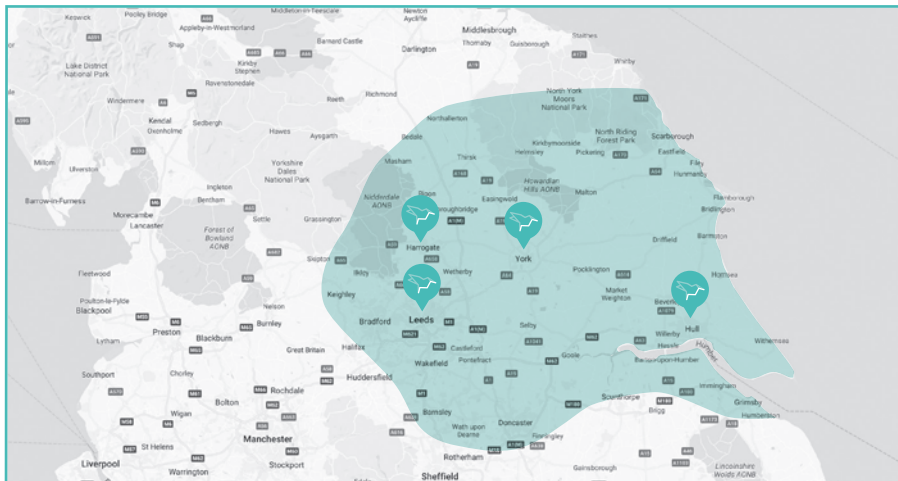

## INTENSIVE NEUROLOGICAL REHABILITATION

**MOTIONrehab**'s Intensive Rehabilitation Packages include 80 hours of neurological rehabilitation over 4-7 weeks with hands-on therapy from highly skilled clinicians. Uniquely, clients also spend time receiving high-intensity training on both upper and lower limb robotic and virtual reality devices. This allows clients to practice high repetitions of movement which is crucial to optimal recovery and maximising outcomes. **MOTIONrehab** Leeds, is the only clinic in the UK with these specific devices, making it an **International Reference Centre for treatment, teaching and research.**

## INTENSIVE UPPER LIMB PROGRAMME

Following the excellent example from The National Hospital for Neurology and Neurosurgery, **MOTIONrehab** wanted to make Intensive Neurological Upper Limb Rehabilitation more widely available to all and is proud to be the only private rehabilitation centre in the UK to offer the complete suite of devices from Tyromotion for Intensive Upper Limb Rehabilitation as part of **MOTIONrehab**'s Intensive Neurological Upper Limb Rehabilitation Programme. **MOTIONrehab** accepts self-referrals as well as referrals from the NHS, Case Managers and Solicitors.
